

Independent Technical
Assessment Report

NO: 2/900

Date: 12/09/00
I.T.A.R. No.: 12/0900
Country: Australia
State: VIC

CLIENT NAME:

Mark IV Remanufactured Compressors and Bri-Jon Pty Ltd

PRODUCT/SERVICES:

Vehicle air conditioning (including buses) compressor remanufacturer

ADDRESS:

40 Fraser Street, Airport West, VIC 3042

PURPOSE:

To demonstrate the effectiveness and reliability of ROC Oil AA1 when used in a variety of swash plate reconditioned automotive compressors and bus compressors.

METHODOLOGY:

The remanufactured compressors are charged with ROC Oil AA1 during the testing of the compressor and are then sold still charged with ROC Oil AA1. A 250ml "top up" pack of ROC Oil AA1 is also included with each remanufactured compressor sold.

RESULTS :

Mark IV / Bri-Jon has been using ROC Oil AA1 in its remanufactured compressors since February 1999. During this period they have charged approximately 2,000 swash plate automotive compressors and 30-40 bus compressors with ROC Oil AA1. To date they have had not had any compressor failures which can be attributed to ROC Oil AA1.

CONCLUSIONS :

This type of field testing over a substantial period of time demonstrates ROC Oil AA1 is both reliable and effective for use in the compressor remanufacturing industry. As the product is non-hygroscopic, low miscible, compatible with all refrigerant gases and non-hazardous to personnel it provides superior benefits when compared to competitor products.

REPORT DOES NOT IMPLY AN ENDORSEMENT BY THE
INDEPENDENT TEST COMPANY.
