

Independent Technical
Assessment Report

NO: 17/700

Date: 17/07/2000
I.T.A.R. No.: 17/700
Country: Australia
State: NSW

CLIENT NAME:
Sydney Auto Air

PRODUCT/SERVICES:

Vehicle air conditioning compressor remanufacturer and servicing

ADDRESS:

161 Botany Road, Waterloo, NSW 2015

PURPOSE:

To demonstrate the effectiveness and reliability of ROC Oil AA1 and AA3 when used in a variety of reconditioned automotive compressors. The compressors used include Sanden, Unicla, Matsushita, Seiko Seki, Zexcel and GM.

METHODOLOGY:

The remanufactured compressors are charged with ROC Oil AA1 or AA3 during the testing of the compressor and are then sold still charged with ROC Oil AA1 or AA3.

RESULTS :

Sydney Auto Air has been using ROC Oil AA1 and AA3 in its remanufactured compressors for approximately three years and has charged around 3,000 compressors with ROC Oil AA1 during this period. To date they have had not had any compressor failures which can be attributed to ROC Oil AA1 or AA3.

CONCLUSIONS :

This type of field testing over a substantial period of time demonstrates ROC Oil AA1 and AA3 is both reliable and effective for use in the compressor remanufacturing industry. As the product is non-hygroscopic, low miscible, compatible with all refrigerant gases and non-hazardous to personnel it provides superior benefits when compared to competitor products.
